

Mits-Myer Electric has been doing outstanding work for JWMumper Construction for about 10 years. Mits-Myer has wired large houses, additions, commercial work, and tenant fit-outs for us.

We have recommended Mits-Myer to previous customers and friends to do small projects ranging from adding an outlet, outdoor accent lighting, changing and upgrading electrical service, to installing stand-by generators.

Customer's call back thanking us for the referral, stating that Mits-Myer completed the task on time and at a fair price. A customer who recently had a new electrical service installed by Mits-Myer called to say the electrical inspector stated it was one of the neatest jobs he had ever seen.

Having confidence that our friends and customers will be satisfied is why we use and recommend Mits-Myer Electrical Contractors.
